

DRIVING SUSTAINABLE RICE CULTIVATION: UNDERSTANDING THE SRP STANDARD AND PERFORMANCE INDICATORS

ABOUT THE COURSE

As an authorized training provider under the Sustainable Rice Platform (SRP), IRRI is organizing and delivering the training on Driving Sustainable Rice Cultivation: Understanding the SRP Standard and Performance Indicators," one of the most relevant courses on best climate-smart and sustainable practices in rice production.

The Sustainable Rice Platform (SRP) is a global multi-stakeholder alliance to promote resource-use efficiency and climate change resilience in rice systems. The goal is to enable one million rice smallholders to adopt climate-smart, sustainable best practices in rice production, boosting farm incomes and livelihoods and protecting our environment through an alliance that drives innovation and creates shared value.

COURSE OBJECTIVES

After this training, the participants will be able to:

- Relate the benefits of sustainable rice farming to farmers;
- Explain the SRP Standards on rice cultivation and the performance indicators; and
- Conduct data collection and assessment among farmers to measure compliance to SRP performance indicators.

COURSE HIGHLIGHT

Successful participants will be awarded the **SRP Authorized Trainer certification**. This certificate allows them to conduct future SRP trainings under the same topic.

CUSTOMIZED SRP TRAINING

IRRI Education works closely with organizations and institutions to customize existing courses or create new courses tailor-fit to their needs. Aside from the two scheduled offerings for 2021, this SRP training can also be offered upon request.
