

Sustainable Rice Platform (SRP)
Standard and Performance Indicators Revision Workshop
21-25 August 2017
Swiss-Bel Resort, Sanur Village, Bali, Indonesia

Background

The SRP is a multi-stakeholder platform established in December 2011. SRP is co-convened by the UN Environment (UNEP) and the International Rice Research Institute (IRRI) to promote resource efficiency and sustainability in trade flows, production and consumption operations, and supply chains in the global rice sector. Following 18 months in development and extensive stakeholder consultation, in October 2015 the SRP launched the world's first sustainability standard for rice - the SRP Standard for Sustainable Rice Cultivation v 1.0 - together with a set of quantitative Performance Indicators.

The SRP Standard comprises 46 requirements grouped under 8 themes. Following the launch, the SRP Standard and Performance Indicators have been implemented at pilot scale by SRP members in several countries and on different farm types. Feedback has been collected by UTZ and IRRI, and will be used as an input to the revision process for both the SRP Standard and Performance Indicators.

Prior to the workshop itself, an online invitation will be extended to all SRP members and external stakeholders, to offer additional feedback on the SRP Standard and Performance Indicators. The workshop will review these recommendations and propose revised text, scoring system and supporting rationale as appropriate.

Expected outcome

The main outcome of this workshop is a draft revision (v.2.0) of the SRP Standard and Performance Indicators, incorporating all proposed changes. The focus of the workshop will be on improving the wording of the existing Standard and Performance Indicators to ensure consistency and clarity. However, discussions on possible new indicators, such as biodiversity, are also welcome.

Post-workshop

The workshop will be followed by a second round of public online consultation on the proposed changes. The outcome will be presented at the SRP General Assembly on 3 October 2017 in Bangkok, while the overall process and timeline to launch v 2.0 of the Standard and Performance Indicators will be presented at the First Global Sustainable Rice Conference and Exhibition in Bangkok on 4-5 October 2017.

Who should attend?

SRP members and external stakeholders interested in participating in the revision and drafting process are cordially invited to join this workshop. For those unable to travel, additional opportunities to participate in the process will nevertheless be available, including the public online consultation and conference session at the First Global Sustainable Rice Conference and Exhibition.

Venue

[Swiss-Bel Resort](#), Sanur Village, Bali, Indonesia

Note: Venue is approximately a 25-minute drive from Denpasar Airport

Accommodation

The Swiss-Bel Resort special rate is 900,000IDR (US\$67). Participants may also choose from other nearby hotels according to preference.

Travel

If you hold a passport from [one of these 169 countries](#), you can enter Indonesia for 30 days without a visa.

Costs

Participation in the workshop is free of charge, including snacks and lunch. Participants are however expected to cover their own travel costs including flights, visa expenses, accommodation and local transport.
